Final Coursework Assigned Project Option 1

I would like you to create a web page that covers a number of elements. Listed below are the required elements to your page:

- A biography section including a picture of you and general information about you and your family. Any detail about your family is good. You can include pictures, general information about your family, what they do for work, and whatever else you wish. Also include in this section what you enjoy, types of music, places to “hang out” as you young people say, and friends you “roll with.”
- A section on what you like to do outside of school. Hobbies, work, social environments (The Mall or El Dorado Sonic) are all great ideas that you could include.
- A section detailing what you would like to do beyond high school. Including the college or vocational school you think you would want to attend would be great. This would be a good way for you to do some research on colleges and learn more about what they offer and their environment as well. Putting the schools mascot and making the page in its school colors would be a good way of going about it. When finished, someone should be able to gain a good idea about what the school you pick offers, where it is located, and what the school is all about in general.
- A section on what you think you will want to do as a career. You will need to get online and research what educational requirements are required, types of skills, where jobs in this area can be found, income aspects, and any additional information that you can include in this section. When finished, someone with no idea about this profession should be able to understand what is needed to operate in that career field.
